

**Table V. Applicant Pool for Selection of Trainees for the Previous Five Years<sup>1</sup>**

<sup>1</sup> PHS 398 (Rev. 5/01), page 68, section 8, Trainee Candidates, paragraph 2, “Create a table for each participating department/unit....”

For each participating Department, give the number of individuals who have: formally applied for training; been offered admission; entered training; completed or are in training; and left the program. If predoctoral or postdoctoral positions are not requested for this program, these data should not be included.

**Rationale:** These data (as well as the data in Tables VI & VII) can be used to evaluate the size and quality of the applicant pool from which trainees may be selected.
